

PROGRAMME

Aquaculture Farmers Workshop THE SECRET OF SUCCESS

Fish health and productivity | Practical demonstrations and health checks in pathology | Water Quality and Systems Current diseases of economic concern and your farm biosecurity plan Are my fish healthy | Why disease hurts | Water testing, dissection procedure | How to sample in the event of a mass mortality.

3 DECEMBER 2022

Faculty of Veterinary Sciences Onderstepoort

Specialised Aquatic Feeds | Tecrover | African Aquatic Veterinary Services | Aqualytic | Speckpumps

- 08:30 Welcome, acknowledgements and information
- 08:30 Dr Gillian Taylor Introduction: Fish health and productivity – what's cooking in our systems?
- 09:10 Dr Gillian Taylor Water quality: what are we not getting right?
(Bring along a water sample from your system to be tested)
- 10:00 Tea/Coffee

Topics: Fish Health & Diagnostics

- 10:30 Dr Gillian Taylor. Daily fish health monitoring: what's healthy and what's not
- 10:45 Prof. Wilmien Powell
Microscope/ parasite assessment: equipment and sampling, common parasites Necropsy: how to dissect and collect samples, what to do with them)
- 10:45 Dr Gillian Taylor/ OPAC Students/ Guest academics
Wet-lab (practical demonstrations and health checks in pathology lab) (Demo microscopy and dissection. Farmers will do a parasite assessment, dissect and collect key samples with assistance.)

13:30 LUNCH

Topics: Biosecurity & Disease Impacts

- 14:30 Dr Gillian Taylor/ Guest academics
Interactive lecture. Current regional diseases of economic concern, impact of disease, and farm biosecurity priorities
- 15:15 Interactive discussion
Questions/ discussion on the day
- 16:00 Dr Gillian Taylor Closing
- 17:00 Cocktails at Onderstepoort
